## Smooth Contemporary Curves

---

from Click® Wiring Accessories.

A comprehensive range of premium decorative metal wiring accessories are now available under the Deco Plus brand. A brand that is synonymous with exceptional quality, high specification and unprecedented value.

The smooth contemporary curves of the Deco Plus range are available in seven finishes to complement any room. Each product is supplied individually packaged in its own distinctive printed box complete with full fitting instructions.

Deco Plus switches feature the same modular switch design as our moulded ranges. All of the switch modules featured in our dedicated MiniGrid® Modules Brochure can therefore be used in any combination on Deco Plus accessories.

Attention to detail has been at the forefront of the design process for our newest range of wiring accessories. All aspects, no matter how small, have been taken into account and collectively create the elegant style that characterises Deco Plus.

## Seven Distinctive Quality Finishes

---

to complement any room.

All Deco Plus products are available with black (BK) or white (WH) inserts, excluding antique brass and black nickel finishes, which are supplied with black insert and gasket only.

The insert colour and product finish are specified in the code structure, this is demonstrated on the previous page. Simply choose the appropriate abbreviation for both the product finish and insert colour (as shown above) to select the design you require.

# Customised Switching

made with you in mind.

Deco Plus has a wide selection of Plate, Toggle and Dimmer switches for every room of your home. All of our switches are supplied complete with the requisite switch module(s). However, should local conditions dictate, installers may customise a switch arrangement by substituting switch modules by means of a simple, single fixing screw.

The unfurnished mounting plates can be ordered separately and furnished with whatever selection of switch modules that may be required to complete your installation.

# Interchangeable Modules

by means of a simple, single fixing screw.

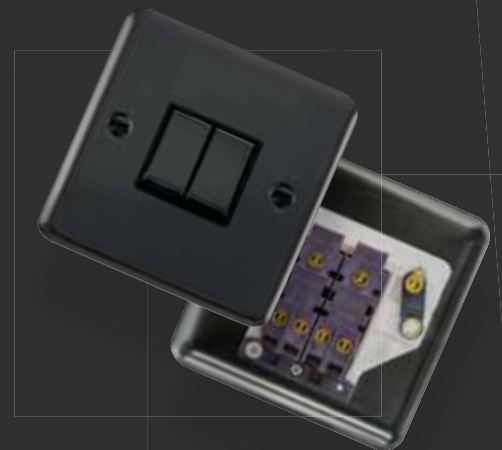

Our MiniGrid® modules are interchangeable with pre-assembled switch plates or can be mounted into the unfurnished switch plates throughout the Deco Plus range.

Standard MiniGrid® modules offer simple, single screw fixing to the yoke which greatly facilitates the assembly of up to 18 different switching functions on a single plate.

MiniGrid® modules are available in the same decorative finishes as the Deco Plus range as well as white and black, so there are plenty of options available to suit your application.

**MINIGRID®**

All switch plates are modular as standard, allowing you to create virtually any switch plate you require.

## Deco Plus New Features

...plus so much more.

With the ever increasing demand for power supplies in all areas of the home, comes the problem of selecting and fitting outlets which blend harmoniously with the décor of the room in which they are to be fitted.

With a wide selection of Power Socket Outlets, Fused Connection Units and Control Switches, along with the seven different Deco Plus plate finishes, a solution for almost every possible design need is provided and will enhance the décor of any area, whether in a kitchen, bedroom, lounge or study etc.

All Deco Plus 13A Sockets and Fused Connection units are tested and approved to BS1363 offering assured quality and safety.

An attractive feature added to the Deco Plus range is the profile of the cooker sockets. Instead of the traditional T-bar shape, our new range matches the profile of our ingot sockets.

Every accessory within the Deco Plus range that contains a neon now has an insert surrounding the lens of the neon.

new  
media™

All New Media™ plates are supplied with black and white gaskets where applicable.

## Solutions for Media Cabling

---

for every interior.

The Deco Plus range includes products designed to deal with handling data and media transfer through telephone, computer, television or radio. For added flexibility as well as the finished products we also supply unfurnished mounting plates designed to accept custom selections of New Media™ modules.

The New Media™ range provides the installer with ultimate flexibility, allowing you to mix and match the connections you have on your wall plate. All of our modules are available in white or black finishes to complement any installation.

Selecting from a wide range of module inserts covering all manner of media transfer, installers are now able to configure their own arrangement of television, radio or satellite reception, plus speaker, telephone and data outlets. All modules can be inserted into single or double wall plates and fitted onto standard switch and socket boxes.
